PREFACE

The need of an historical bibliographical guide to the publications of the Dominion Bureau of Statistics has long been felt by librarians and statisticians engaged in research. Since the founding of the Bureau in 1918, it has issued an impressive number of publications which constitute reliable statistical sources of data for the measurement of Canada's social and economic activities from the close of the First World War and earlier. But the Bureau has likewise grown and undergone many changes in internal statistical organization in its development as Canada's Central Statistical Agency. Through the forty-eight years of its history, these changes have been reflected in the increased number, variety and size of its publications and in the revision of titles to keep pace with changing concepts, content, and emphasis.

The institution in 1959 of a new classification system in the Bureau's Library, facilitating the arrangement of many hundreds of current Bureau publications as an organized and co-ordinated collection, provided the basis for the preparation of this historical catalogue. In its coverage, its arrangement of entries and its indexes, this catalogue, not only incorporates the classification system initiated in 1959 and now used in the catalogue of current publications of the Dominion Bureau of Statistics (Ottawa, November 1964), but also applies this same arrangement to Bureau publications issued from its founding in 1918 down to 1960. In addition to applying a uniform classification throughout, the historical catalogue provides an historical guide to the publications of the Bureau during this period and, in conjunction with the current catalogues of 1960 and 1964, presents a complete record of all publications issued by the Dominion Bureau of Statistics.

This historical catalogue of Bureau publications was prepared under the supervision of the Head Librarian, Mr. B. A. Ower, by Miss Audrey MacGregor, Assistant Head, with the co-operation of the Library Staff in editing, revising and typing the manuscript. The co-operation of the Directors of statistical divisions of the Bureau in advising on their publication revisions and changes in concept is gratefully acknowledged, as is the generous co-operation of the staff of the National Library in editing the French language section of the catalogue.

WALTER E. DUFFETT,
Dominion Statistician.

PREFACE

Les bibliothécaires et statisticiens voués à la recherche éprouvent depuis longtemps le besoin d'un guide bibliographique rétrospectif des publications du Bureau fédéral de la statistique. Depuis sa fondation, en 1918, le Bureau a publié un nombre impressionnant d'ouvrages et de documents qui sont autant de sources de données exactes permettant de mesurer l'évolution sociale et économique du Canada depuis et avant la Première Guerre mondiale. Mais le Bureau a également élargi son champ d'action et apporté de nombreuses modifications à la structure interne de la statistique au cours de son évolution comme organisme central de la statistique canadienne. Pendant les quarante-huit années de son existence, ces changements se sont reflétés dans l'accroissement, la variété et l'ampleur des publications, dont il a fallu reviser les titres pour tenir compte des changements de concepts, de teneur et d'accent.

L'adoption, en 1959, d'une nouvelle classification à la bibliothèque du Bureau, dont l'objet était de faciliter la disposition de plusieurs centaines de publications courantes en une collection bien ordonnée, forme la base de ce catalogue récapitulatif. La classification, ainsi que la coordination des documents et l'index des articles dans ce catalogue ne comprennent pas seulement la matière réunie dans le système de classification de 1959 et maintenant utilisée dans le catalogue des publications courantes du Bureau fédéral de la statistique (Ottawa, novembre 1964), mais classent aussi les publications du Bureau parues depuis sa fondation en 1918, jusqu'en 1960. Le catalogue récapitulatif, en plus d'établir une classification entièrement uniforme, produit un guide chronologique des publications du Bureau durant cette période et, avec les catalogues courants de 1960 et 1964, offre une nomenclature complète de toutes les publications du Bureau fédéral de la statistique.

Le catalogue rétrospectif des publications du Bureau a été établi sous la direction du bibliothécaire, M. B. A. Ower, par Mlle Audrey MacGregor, adjointe, en collaboration avec le personnel de la bibliothèque pour l'édition, la révision et la copie dactylographiée du manuscrit. Le concours des directeurs des divisions du Bureau, qui nous ont signalé les révisions de leurs documents, et avertis de leurs nouveaux concepts, nous a été très précieux, de même que la contribution généreuse du personnel de la Bibliothèque nationale, qui a bien voulu se charger de l'édition de la partie française du Catalogue.

Le Statisticien du Dominion,
WALTER E. DUFFETT,

INTRODUCTION

The Historical Catalogue of Dominion Bureau of Statistics Publications, 1918-1960 is designed not only as a bibliographical guide to the publications issued by the Dominion Bureau of Statistics, since its inception in 1918 and up until 1960 but also as a means whereby a library collection of Bureau publications can be physically organized, classified and catalogued. From 1960 on, the bibliographical details are contained in the catalogue of current publications.

Coverage

The historical catalogue lists all publications designed to provide statistical information for the public with the exception of special statements, press releases and preliminary or advance statements which were issued ahead of regularly scheduled final reports. In most cases these types of material never appeared in the various catalogues or lists of publications issued by the Bureau. Also excluded are publications restricted to DBS internal or limited use, such as the various operating manuals and similar types of materials.

The basis for listing a publication herein was its physical existence, thereby excluding titles never published, even though they may have been entered in lists of projected publications. This historical catalogue takes cognizance of the irregularities, inconsistencies and time gaps arising from the early difficulties of launching a publication program, the period of depression from 1930 to 1939, and the war period from 1940 to 1945 with its suspension of revised or final editions of publications, the skipping of certain annual editions, etc. Although a careful check was made with the subject divisions to establish what happened in such cases, it is possible that a few gaps recorded in the catalogue may have arisen from the loss of publications from the Library's master collection rather than from the fact that they were not issued. The Bureau Library will be grateful for the reporting of any DBS titles appearing in the collection of other libraries that have not been included in this catalogue. A number of titles have appeared in various lists of publications but have been established as never having been published and are noted herein at p. 234.

Prior to 1948, it was the practice to have printed publications made at the main plant of the Queen's Printer, while processed publications were run off at the printing plant of the Bureau of Statistics. Printed publications are distinguished from processed publications by the inclusion of the imprint of the Queen's (King's) Printer on the publications and this is noted in the bibliography. Following the transfer of the Bureau printing plant to the jurisdiction of the Queen's Printer in 1948, all publications of later date carry the Queen's Printer's imprint.

Indexes

Appended is an alphabetically arranged title index which includes all variations of titles and indicates corresponding catalogue numbers. Thus,

libraries and other users having older titles and who are uncertain as to where they should be allotted in the classification scheme can quickly ascertain the correct catalogue numbers without extensive searching of the catalogue. A subject index, however, is not included because the classification provides adequate means to establish all publications issued by the Bureau covering any subject area. Readers are referred to the index of the Bureau's catalogue of current publications which provides adequate guidance to persons wanting detailed information. This historical catalogue is designed as a finding and cataloguing guide to Bureau publications rather than as a guide to detailed statistics on an historical basis.

Users of this catalogue are warned of the necessary revisions of statistical series which have occurred (sometimes frequently) and should refer to the definitions of concepts and methods contained in the reports themselves. A useful source for continuous historical statistics is **Historical Statistics of Canada**, edited by M. C. Urquhart and K. A. H. Buckley. (Toronto, Macmillan, 1965), which brings into one place many statistical series and has adequate explanatory notes on the variations which have occurred in these series.

Unilingual and Bilingual Publications

The historical catalogue is issued in two sections, the first for English titles and the second for French titles. Each section carries all bibliographical information in the language of the title listed. Bilingual titles are listed in both sections, with full information in the language of the Section in conformity with the practice in the Queen's Printer's catalogues of **Canadian Government Publications** and the arrangement for Canadian Government documents in **Canadiana**, published by the National Library.

Historical Information

While the historical catalogue is basically a bibliographic guide to the publications of the Bureau, details are provided for the main statistical publications of the Government of Canada which were issued prior to the founding of the Bureau in 1918. Full details are given for the various censuses from that of 1851 for the old Province of Canada and for the publications of the Census and Statistics Office, which was founded in 1908 and can be considered a predecessor to the Bureau. For publications which were issued by other Departments and subsequently transferred to the Bureau after 1918, details are given only as to years covered by these previous serial publications.

System of Classification

The Dominion Bureau of Statistics has developed a system of catalogue numbers which are used to identify, first the major and minor subject groupings to which publications belong; and secondly the periodicity of issuance of the publications.

These catalogue numbers consist of five digits with the first two indicating the subjects and the last three the periodicity. The five digits of the catalogue number are built up in this manner:

First digit — indicates the major subject grouping.

Second digit — indicates the minor grouping within the major grouping.

Third digit — indicates the frequency of publication.

“0” indicates periodicals issued more often than once a year;

“2” indicates annuals;

“4” indicates biennials and

“5” indicates occasional issues.

Fourth and fifth digits provide serial identification of titles within that particular combination of major and minor subject grouping and frequency of publication.

Example:

82-201 Notifiable diseases

8 Education, health and welfare (major grouping)

2 Public health (minor grouping)

201 First annual title in this particular grouping

The cataloguing system was designed to be used for filing DBS publications as a separate organized collection. Since its inauguration in 1959 the catalogue numbers have been printed on the cover of each publication and provide continuity of identification regardless of any change in the title. Libraries using the Queen's Printer's classification are able to use this DBS classification as it has been adopted as a sub-classification of the former.

For publications issued prior to 1959 a modification of the DBS classification numbers was adopted. The symbol “D” was inserted after the first two digits thus indicating a discontinued title. All D number publications are assigned to the subject groups of the current classification on the basis of the subject covered.

It should be noted that D number series have only two digits for the periodicity designation in the number arrangement; however, the first digit following the letter D signifies the periodicity in the same manner as does the last three digits in the current classification.

Example:

84-D-01 Births, marriages and deaths in Canada. 1st quarter 1932-
3rd quarter 1950. Ottawa, [1932-1951]
Quarterly.

21-D-22 Farm land values, 1918-1955. Ottawa, Q.P., 1919-1956.
Annual.

INTRODUCTION

Le Catalogue rétrospectif des publications du Bureau fédéral de la statistique, 1918-1960, ne constitue pas seulement un guide bibliographique des publications du Bureau depuis sa création en 1918 et jusqu'à 1960, mais un moyen d'ordonner physiquement les ouvrages du Bureau, de les classer et de les cataloguer. C'est pourquoi l'agencement du catalogue se modèle sur le système de classification utilisé actuellement. Pour 1960 et les années suivantes, les renseignements bibliographiques se trouvent dans le catalogue des publications courantes.

Champ d'application

Le catalogue rétrospectif mentionne toutes les publications propres à fournir des renseignements statistiques au public, sauf les études particulières, les communiqués de presse ou les aperçus provisoires ou anticipés, publiés avant les rapports réguliers. La matière de ce genre n'est pas habituellement inscrite dans les catalogues ou répertoires imprimés par le Bureau. Sont également exclus les ouvrages dont l'usage est strictement interne ou réservé au B.F.S., tels les différents manuels de directives et autres documents de même nature.

L'inventaire se fonde sur l'existence physique de la publication à l'exclusion, par conséquent, des ouvrages inédits, quoique paraissant peut-être sur des listes de publications projetées. Le présent catalogue tient compte des irrégularités, discordances et intervalles de temps qui ont résulté des difficultés initiales que posaient l'établissement d'un programme d'édition, la crise économique de 1930 à 1939, la période de guerre de 1940 à 1945 durant laquelle les éditions révisées et définitives ont été interrompues, et de la suspension de certaines publications annuelles, et ainsi de suite. Malgré une vérification scrupuleuse auprès des divisions qui ont fourni la matière, il se peut que certaines brèches existent dans le catalogue par suite de la disparition d'ouvrages de la collection maîtresse de la bibliothèque, plutôt que par l'absence d'ouvrages qui n'ont pas été publiés. La bibliothèque du Bureau sera reconnaissante à quiconque lui signalera les titres d'ouvrages du B.F.S. faisant partie de la collection d'autres bibliothèques et qui n'auraient pas été inscrits dans le présent catalogue. Un certain nombre de titres qui paraissent dans divers répertoires de publications mais qui, par contre, n'ont jamais été publiés, sont indiqués dans le catalogue à la p. 234.

Jusqu'à 1948, les ouvrages étaient imprimés à l'imprimerie de la Reine, alors que les impressions photo-mécaniques se faisaient à l'imprimerie du Bureau fédéral de la statistique. Les ouvrages imprimés se distinguent des impressions photo-mécaniques par la marque de l'Imprimeur de la Reine (ou du Roi) sur la couverture, notée dans la bibliographie. Depuis que l'imprimerie du Bureau relève de l'Imprimeur de la Reine, soit depuis 1948, toutes les publications portent cette marque.

Index

Un répertoire alphabétique des titres est annexé au catalogue, y compris toutes variantes des titres, avec indication des numéros de catalogue correspondants. Ainsi, les bibliothèques et autres utilisateurs disposant de titres plus anciens et ne sachant où les situer dans la classification peuvent repérer tous les numéros de catalogue exacts sans trop chercher. Toutefois, la classification ne contient pas d'index des sujets, parce qu'elle fournit assez de moyens de repérer toutes les publications du Bureau qui traitent des divers sujets abordés. Les lecteurs sont priés de consulter l'index du catalogue des publications courantes du Bureau, lequel constitue un guide convenable pour les personnes désireuses de renseignements détaillés. Cet inventaire rétrospectif a été conçu pour servir de guide dans le repérage et le catalogage des publications du Bureau et non de répertoire statistique détaillé qui reposerait sur une base chronologique.

Les utilisateurs du présent catalogue sont informés des revisions, parfois fréquentes, des séries statistiques, et devraient se reporter aux définitions des concepts et méthodes contenues dans les rapports mêmes. L'ouvrage intitulé **Historical Statistics of Canada** (Toronto, Macmillan, 1965) préparé par MM. M. C. Urquhart et K. K. Buckley, constitue une source précieuse de statistiques rétrospectives ininterrompues; il réunit en un seul volume plusieurs séries statistiques et contient les notes explicatives appropriées quant aux variations de ces séries.

Les publications unilingues et bilingues

Le catalogue rétrospectif est publié en deux parties: la première comprend les titres anglais et, la seconde, les titres français. Chaque partie contient l'information bibliographique complète dans la langue du titre de l'ouvrage. Les ouvrages bilingues sont inscrits dans les deux parties du catalogue, et tous les renseignements sont dans la langue propre à chaque partie, conformément à la pratique adoptée pour le **Catalogue Publications du Gouvernement Canadien** établi chez l'Imprimeur de la Reine, et **Canadiana**, catalogue de la Bibliothèque nationale.

Renseignements récapitulatifs

Même si le catalogue rétrospectif est fondamentalement un guide bibliographique des publications du Bureau, il renferme néanmoins des précisions sur les principaux ouvrages officiels que le gouvernement canadien a publiés avant la fondation du Bureau en 1918 et des détails complets sur les recensements successifs depuis 1851, pour l'ancienne province du Canada, ainsi que des précisions sur les publications du recensement et du Bureau des recensements et statistiques, fondé en 1908, lequel peut être considéré comme l'ancêtre du Bureau actuel. Les particularités des documents publiés par d'autres Ministères et confiés par la suite au Bureau, postérieurement à 1918, ne sont inscrites que pour les années couvertes par ces séries de publications antérieures.

Système de classification

Le Bureau fédéral de la statistique a mis au point un système de catalogage par numéros lesquels servent à identifier, premièrement, les grands

3: MANUFACTURING

The term "Census of industry" was used from 1918 to about 1946 to include all annual reports then being issued by the Industry and Merchandising Division. The term was used to show the complete coverage of all firms in industry annual reports rather than the practice, as in the United States and United Kingdom, of having complete coverage in census years and partial coverage for other years.

With the establishment of the Bureau it was the policy to issue annual reports on individual industries in mimeographed form as preliminary or advance reports. These were followed up by final printed volumes covering groups of industries, and these final volumes were issued annually, biennially, or as, in at least one group, at five year intervals. Explanatory notes have been included as part of the bibliographical detail for all titles issued as final group volumes. During the Second World War, this practice was dropped as an economy measure and not resumed because of the time-lag.

The annual industry reports are now the final volumes. This note covers the annual titles in sub-groups 32-36 inclusive and 41-47 inclusive.

- 98-1931P-6 — **Population, 1871-1931 (reprint of pages 1-150 of vol. 2).** Ottawa, K.P., 1934. E/F.
A number of bulletins were issued as part of the census of merchandising and service establishments. Some of these were preliminary to the final volumes and dealt with retailing activities by leading cities and towns, by counties or census divisions, by provinces and for Canada as a whole, or with wholesale activities by provinces, leading centres and Canada as a whole. These need not be retained and are not listed in the catalogue; however, the DBS Library will provide detailed information on request. The rest of the bulletins are listed under group 63- . . . in the catalogue. These were either considered the first issues of annual reports, or presented a form of analysis not included in the final volumes. They are identified by asterisks.
- 98-1936F — **Census of the Prairie Provinces. 1936.** Ottawa, K.P., 1938. 2v. E/F.

CENSUS OF CANADA 1956

Results of the 1956 Census of Population and Agriculture have been issued as a series of reports rather than as bound volumes. The reports are prepared so that, by removal of the covers, the tables can be placed in loose-leaf binders or bound in volume form. In the latter case, reports 92-501 to 92-514 and 93-501 to 93-508 form the first volume, reports 96-501 to 96-511 the second volume, and reports 99-501 to 99-510 the third volume.

Individual titles to the series of bulletins will be found in "Current publications, Dominion Bureau of Statistics 1960".

3: MANUFACTURES

De 1918 à 1946 environ, l'expression "Census of industry" englobait tous les rapports annuels que la Division de l'industrie et du commerce publiait. On voulait signifier par cette expression que l'on relevait les rapports annuels de toutes les sociétés commerciales de l'industrie contrairement à l'usage qui prévalait aux Etats-Unis et au Royaume-Uni de procéder à un relevé complet l'année du recensement et à un relevé partiel les autres années.

Lors de la création du Bureau, on procédait de la façon suivante: les rapports annuels de chaque société commerciale étaient photocopiés et considérés comme des rapports préliminaires. Ces rapports préliminaires étaient ensuite groupés suivant le genre d'industrie dans des rapports définitifs publiés tous les ans, deux ans ou cinq ans comme ce fut le cas pour au moins un genre d'industrie. Cette pratique fut abandonnée durant la seconde guerre mondiale pour des raisons d'économie et ne fut pas reprise en raison du retard causé par cet arrêt.

Les rapports annuels des sociétés commerciales de l'industrie sont maintenant les rapports définitifs. Cette note s'applique aux titres annuels des sous-groupes 32 à 36 inclusivement et 41 à 47 inclusivement.

Un certain nombre de bulletins constituaient, par l'origine
de leur publication, des parties du recensement des établisse-
ment de commerce et de service. Quelques-uns devinrent des
rapports préliminaires aux rapports définitifs et traitèrent du
commerce de détail par villes et centres importants, par comtés
ou divisions établies pour le recensement, par provinces et pour
l'ensemble du Canada, et aussi du commerce de gros par pro-
vinces, par centres importants et pour l'ensemble du Canada.
Il n'est pas nécessaire de conserver ces bulletins qui n'apparaîs-
sent pas dans le présent catalogue, cependant la bibliothèque
du Bureau fédéral de la statistique fournit les renseignements
sur demande. Les autres sont relevés dans le sous-groupe 63
de ce catalogue. Ils furent considérés comme les premiers rap-
ports annuels ou comme les commentaires non inclus dans les
rapports définitifs. Leur titre est précédé d'un astérisque.

Recensement du Canada de 1956

Les résultats du recensement de la population et de l'agriculture de 1956 ont été publiés sous forme de rapports plutôt qu'en volumes reliés. Ces rapports ont été publiés de façon à ce qu'en enlevant la couverture, les tableaux puissent être insérés dans un relieur à feuilles mobiles ou être reliés en volume. Dans ce dernier cas, les rapports 92-501 à 92-514 et 93-501 à 93-508 forment le premier volume, les rapports 96-501 à 96-511 le deuxième volume, et les rapports 99-501 à 99-510 le troisième volume.

Les titres individuels de cette série de rapports se trouvent dans le catalogue du "Bureau fédéral de la statistique, publications courantes, 1960" (11-204).
